Clean and green campus initiatives

YSNM is very sensitive toward healthy environment; in almost all its activity environment consciousness is visible. College has a club named Eco club which is responsible for framing and designing program.

Eco Club Formation

Name of the coordinators (Teachers) of the club: -

- Mrs. Seema Kumari
- Dr. Mini Tudu
- Dr. Jenifar Guria

Member from College Management Committee (CMC)

- Dr. Mohini Gupta - Principal – Incharge, Y S N M College, Medininagar
- Dr. Mashrique Jahan – IQAC, Co-ordinator , Y S N M College, Medininagar

Member from Parents

- Mr. Sushil Kumar
- Mr. Rajiv Ranjan Pandey

Member from Students / Union body

- Nivedita Kumari, Department of English
- Alka Aditi, Department of English

To raise awareness among students about the technicalities of nature conservation, the Internal Quality Assurance Cell (IQAC) organized two consecutive programs

The first seminar, held in collaboration with the National Service Scheme (NSS) on June 5, 2023, aimed to deepen students' understanding of environmental issues and the importance of conservation. The NSS coordinator played a pivotal role in this event, providing students with insights into various aspects of nature and encouraging them to actively participate in the NSS.

Through these seminars, students gained valuable knowledge about the practical aspects of conserving nature and the role they can play in this effort. The seminars not only educated them on environmental topics but also inspired them to get involved in community service through NSS, fostering a sense of responsibility towards the environment and promoting sustainable practices.

On July 22, 2023, in celebration of World Nature Conservation Day, the Internal Quality Assurance Cell (IQAC) organized a one-day workshop titled “Preserving our Planet: Empowering Action for a Sustainable Future.” This event aimed to raise awareness about environmental conservation and promote sustainable practices. The workshop featured esteemed guests including Divisional Forest Officer of Medininagar, Soumitra Shukla; Deputy Director North Division of the Tiger Reserve Palamu, P. Jena; and Project Planning Officer for Waste Management, Rahul Anand. Each speaker brought their unique expertise and insights, providing attendees with a comprehensive understanding of the challenges and opportunities in environmental conservation.

The workshop covered a range of topics, from the importance of preserving natural habitats and biodiversity to practical strategies for waste management and sustainable living. Soumitra Shukla highlighted the critical role forests play in maintaining ecological balance, while P. Jena discussed ongoing efforts and challenges in managing the Tiger Reserve. Rahul Anand emphasized the significance of effective waste management practices in reducing environmental impact. The event concluded with an engaging Q&A session, where participants actively discussed how to implement these strategies in their communities. Overall, the workshop successfully empowered attendees to take actionable steps towards a sustainable future.

A one day workshop on conservation of environment at YSN Mahila college Daltonganj

MI NEWS SERVICE

DALTONGANJ: Young college girls of the YSN Mahila college Daltonganj express concern for environment and climate. A one day workshop on preserving the planet empowering action for a sustainable future under the umbrella of the IQAC cell of the Yodh Singh Namdhari Mahila college Daltonganj was held today in its well maintained auditorium.

Divisional forest officer Medininagar Soumitra Shukla, deputy director North division of the tiger reserve Palamu P Jena and project planning officer waste management Rahul Anand graced the occasion.

From the side of the NP university there came Dr K C Jha proctor. There was the battery of teachers of this college notably Dr Vijay Kumar Prasad, Dr Mashrique, Dr Shobha, Dr Sarita, D K Pandit etc. Dr Mohini Gupta professor in charge of YSN Mahila college in her brief but

thoughtful address emphasised the preservation of environment and advised the students to take initiative in the preservation and conservation of environment.

Dr Mohini (popular by her first name) said the survival of environment is the mainstay of life on earth. It's loss is irreparable she reminded. It's still time to save the environment said Dr Gupta.

A couple of students like Isha (doing post graduate in History), Alia Naz (doing English honours), Priya Singh (doing Zoology honours) etc raised relevant and appropriate questions which were answered by Shukla and Jena in their own simple way. No question of the students was any set aside as

absurd but the two IFS officers looked pretty satisfied that young girls are now giving time and thought to the issues of environment.

Isha asked about solar system while Alia Naaz wanted to know if electronic transport is better than gas driven transport. Priya Singh said how people set goals for good house but not for healthy environment. The girls asked the questions half English and half Hindi! Shukla and Jena were attentive to their questions.

DFO Medininagar Soumitra Shukla used homely examples to drive his point home as to how to save environment and climate. Shukla avoided jargons. He was down to earth.

"Eco-Warriors in Action: NSS and NCC's Clean-Up Campaign"

As part of their extension activities, the National Service Scheme (NSS) and National Cadet Corps (NCC) organized a comprehensive clean drive both inside and outside the campus. This initiative aimed to enhance the cleanliness and hygiene of the campus environment, as well as the surrounding areas. Volunteers from NSS and NCC actively participated in the drive, working diligently to remove litter, manage waste, and promote recycling. The clean drive not only improved the physical appearance of the campus and its vicinity but also raised awareness among students and staff about the importance of maintaining a clean and green environment. Through this collective effort, the NSS and NCC successfully instilled a sense of civic responsibility and environmental stewardship within the campus community.

Beyond the campus environmental promotion activities

On the occasion of “World Environment Day,” the faculty of YSNM College launched a green initiative by distributing saplings to students, encouraging them to plant these baby trees in their homes or suitable locations within the community. This initiative aimed not only to increase greenery around Palamu but also to raise awareness about the importance of environmental conservation. The college organized various activities, including workshops on sustainable gardening practices and the benefits of tree plantation, to ensure the saplings would grow and thrive. By involving students in this hands-on project, YSNM College hopes to foster a sense of environmental stewardship and contribute to a healthier, greener future for Palamu.
